NOTICE TO READER

These financial statements have been prepared by management of the Company. We have compiled the interim balance sheet of Canada Gas Corp. (formerly Wyn Developments Inc.) as at October 31, 2009 and the interim statements of loss and deficit and cash flows for the nine months then ended. Independent accountants have not audited, reviewed or otherwise attempted to verify the accuracy or completeness of such information. Per NI 51-102 Section 4.3(3)(a), Continuous Disclosure Obligations, provides that if an auditor has not performed a review of interim financial statements, the interim financial statements must be accompanied by a notice indicating that the financial statements have not been reviewed by an auditor. Readers are cautioned that these statements may not be appropriate for their purposes.

CANADA GAS CORP.
(Formerly Wyn Developments Inc.)
Notes to Financial Statements
For the Nine Month Period Ended October 31, 2009 and 2008

1. NATURE OF OPERATIONS

Canada Gas Corp. (formerly Wyn Developments Inc.) (the "Company") was incorporated under the *Company Act* of British Columbia on February 1, 1984. The Company is involved in the exploration for and operation of oil and gas properties in Canada. The Company presently operates in one geographical area, namely Canada. The Company is publicly traded and is listed on the TSX Venture Exchange (the "TSX-V") in Canada.

2. GOING CONCERN

These financial statements have been prepared on a going concern basis, which presumes the realization of assets and discharge of liabilities in the normal course of business for the foreseeable future.

The Company has incurred significant operating losses over the past several fiscal years and is currently prospecting value added opportunities and equity financing to continue operations. The Company reported net losses of \$157,923 and \$250,842, respectively, for the nine month periods ended October 31, 2009 and 2008, and has an accumulated deficit of \$24,653,058 (2008 - \$22,189,271). The Company has a working capital deficit of \$376,387 (2008 - \$44,460). During the period, the Company entered into shares for debt agreements to settle \$255,000 of short term loans and accounts payable including \$140,500 owed to related parties (see Note 7(d), 8(b), and 9(x)). Completion of these shares for debt agreements and future equity financing will improve the Company's financial condition. Due to the Company's limited source of operating cash flow, there is no assurance that sufficient funding will be available to conduct further exploration and operations on the Company's existing oil and gas interests.

The application of the going concern concept is dependent upon the Company's ability to generate future profitable operations and receive continued financial support from its creditors and shareholders or raise additional equity financing. The current financial equity market conditions and the challenging funding environment make it difficult to raise funds by placement of common shares. There is no assurance that the Company will be successful with any financing ventures. Management is actively engaged in the review and due diligence on new projects, is seeking to raise the necessary capital to meet its funding requirements and has undertaken available cost cutting measures. There can be no assurance that management's plan will be successful. Therefore a significant uncertainty exists in relation to the Company's ability to continue as a going concern.

If the going concern assumption were not appropriate for these financial statements then adjustments would be necessary in the carrying values of assets and liabilities, the reported expenses and the balance sheet classifications used. Such adjustments would be material.

The business of oil and gas exploration involves a high degree of risk and there can be no assurance that current exploration programs will result in profitable operations. The Company has limited sources of revenue, and has significant cash requirements to meet its administrative overhead and maintain its oil and gas interests. The recoverability of amounts shown for resource properties is dependent on several factors. These include the discovery of economically recoverable reserves, the ability of the Company to obtain the necessary financing to complete the development of these properties, and future profitable production or proceeds from disposition of oil and gas interests.

CANADA GAS CORP.
(Formerly Wyn Developments Inc.)
Notes to Financial Statements
For the Nine Month Period Ended October 31, 2009 and 2008

3. SIGNIFICANT ACCOUNTING POLICIES

These financial statements have been prepared in accordance with Canadian generally accepted accounting principles. The functional and reporting currency of the Company is the Canadian dollar. Significant accounting policies are:

(a) Financial Instruments

The Company classifies its financial instruments into one of these five categories: held-for-trading, held-to-maturity, loans and receivables, available-for-sale financial assets or other financial liabilities. All financial instruments are measured in the balance sheet at fair value, except for loans and receivables, held-to-maturity investments and other financial liabilities, which are measured at amortized cost. Subsequent measurement and changes in fair value will depend on their initial classification as follows: held-for-trading financial assets are measured at fair value and changes in fair value are recognized in net income; available-for-sale financial instruments are measured at fair value with changes in fair value recorded in other comprehensive income until the investment is no longer recognized or impaired, at which time the amounts would be recorded in net income.

Transaction costs that are directly attributable to the acquisition or issuance of financial instruments that are classified as other than held-for-trading, which are expensed as incurred, are included in the initial carrying value of such instruments.

(b) Comprehensive Income

Comprehensive income is the overall change in the net assets of the Company for a period, other than changes attributable to transactions with shareholders. It is made up of net income and other comprehensive income. Other comprehensive income includes gains or losses, which generally accepted accounting principles requires to be recognized in a period but excluded from net income for that period. The Company has no items of other comprehensive income in any period presented. Therefore, net loss as presented in the Company's statements of operations and deficit equals comprehensive loss.

(c) Oil and gas interests

The Company follows the full cost method of accounting for petroleum and natural gas interests whereby all costs of exploration for and development of petroleum and natural gas reserves are capitalized. These costs include leasehold acquisition costs, geological and geophysical expenses, drilling costs of successful as well as unsuccessful wells and overhead charges related directly to exploration and development activities.

If the interests are sold, the proceeds of the interests will be applied against capitalized costs unless such sale significantly impacts the rate of depletion.

CANADA GAS CORP.
(Formerly Wyn Developments Inc.)
Notes to Financial Statements
For the Nine Month Period Ended October 31, 2009 and 2008

3. SIGNIFICANT ACCOUNTING POLICIES (Continued)

(c) Oil and gas interests (Continued)

Costs associated with unproven reserves are reviewed by management to determine whether they have become impaired. The ceiling test is calculated by comparing the carrying value of oil and gas interest to the sum of undiscounted cash flows expected to result from future production of proved reserves and carrying value of unproved properties, net of any impairments. Estimates of future net revenues are based on expected future commodity prices and costs rather than those existing at the measurement date. It is possible that changes could occur that would adversely affect management's estimates resulting in further write-downs of the carrying value of the interest. If impairment occurs, the carrying value of the related interest will be reduced to reflect the estimated net realizable value.

The amounts shown for petroleum and natural gas interests represent costs incurred to date less depletion and impairment if any, and do not necessarily reflect present or future values.

(d) Depletion

Depletion of petroleum and natural gas interests is computed using the unit-of-production method whereby the ratio of current year production to estimated proved future production determines the proportion of depletable costs to be expensed. Undeveloped properties are excluded from the depletion calculation until quantities of proved reserves are found or if impairment occurs.

(e) Use of estimates

The preparation of financial statements in conformity with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Significant areas requiring the use of management estimates include determination of environment obligations, asset retirement obligation, rates for amortization, the impairment of mineral property interests, impairment of oil and gas interests, valuation allowance for future tax assets and the assumptions used in estimating the fair value of stock-based compensation. Management believes the estimates are reasonable; however, actual results could differ from those estimates and could impact future results of operations and cash flows.

(f) Foreign currency translation

Amounts recorded in foreign currency are translated into Canadian dollars as follows:

- (i) Monetary assets and liabilities, at the rate of exchange in effect as at the balance sheet date;
- (ii) Non-monetary assets and liabilities, at the exchange rates prevailing at the time of the acquisition of the assets or assumption of the liabilities; and
- (iii) Revenues and expenses (excluding amortization, which is translated at the same rate as the related asset), at the rate of exchange on the transaction date.

The effects of translation are credited or charged to the statement of operations as foreign exchange gain or loss.

CANADA GAS CORP.
(Formerly Wyn Developments Inc.)
Notes to Financial Statements
For the Nine Month Period Ended October 31, 2009 and 2008

3. SIGNIFICANT ACCOUNTING POLICIES (Continued)

(g) Amortization

Amortization of capital assets is calculated on the straight-line basis over the useful lives of the assets as follows:

Furniture and equipment	–	5 years
Leasehold improvements	–	5 years
Software license	–	2 years

(h) Asset retirement obligation (“ARO”)

The Company recognizes an estimate of the liability associated with an ARO in the financial statements at the time the liability is incurred. The estimated fair value of the ARO is recorded as a long-term liability, with a corresponding increase in the carrying amount of petroleum and natural gas interests. The capitalized amount is depleted on a unit-of-production method based upon proven petroleum and natural gas reserves. The liability amount is increased each reporting period due to the passage of time and the amount of accretion is charged to operations in the period. The ARO can also increase or decrease due to changes in the estimates of timing of cash flows or changes in the original estimated undiscounted cost. Actual costs incurred upon settlement of the ARO are charged against the ARO to the extent of the liability recorded.

(i) Stock-based compensation

The Company accounts for stock-based compensation using a fair value based method with respect to all stock-based payments measured and recognized, to directors, employees and non-employees. For directors and employees, the fair value of the options is measured at the date of grant. For non-employees, the fair value of the options is measured on the earlier of the date at which the counterparty performance is completed or the date the performance commitment is reached or the date at which the equity instruments are granted if they are fully vested and non-forfeitable. The fair value of the options is accrued and charged to operations, with the offset credit to contributed surplus. For directors and employees the options are recognized over the vesting period, and for non-employees the options are recognized over the related service period. If and when the stock options are ultimately exercised, the applicable amounts of contributed surplus are transferred to capital stock.

(j) Loss per share

Basic loss per share is computed using the weighted average number of common shares outstanding during the year. Diluted loss per share amounts are calculated giving effect to the potential dilution that would occur if securities or other contracts to issue common shares were exercised or converted to common shares using the treasury stock method. The treasury stock method assumes that proceeds received from the exercise of stock options and warrants are used to repurchase common shares at the prevailing market rate. However, the calculation of diluted loss per share excludes the effects of convertible instruments that would be anti-dilutive. Shares held in escrow, other than where their release is subject to the passage of time, are excluded from the computation of loss per share until the conditions for their release are satisfied.

CANADA GAS CORP.
(Formerly Wyn Developments Inc.)
Notes to Financial Statements
For the Nine Month Period Ended October 31, 2009 and 2008

3. SIGNIFICANT ACCOUNTING POLICIES (Continued)

(k) Income taxes

The Company uses the asset and liability method for accounting for income taxes. Under this method of tax allocation, future income tax assets and liabilities are determined based on differences between the financial statement carrying values and their respective income tax basis, and losses carried forward. Future income tax assets and liabilities are measured using the tax rates expected to be in effect when the temporary differences are likely to reverse. The effect on future income tax assets and liabilities of a change in tax rates is included in operations in the period in which the change is enacted or substantially assured. The amount of future income tax assets recognized is limited to the amount of the benefit that is more likely than not to be realized.

(l) Flow-through shares

Flow-through shares entitle a company that incurs certain resource expenditures in Canada to renounce them for tax purposes allowing the expenditures to be deducted for income tax purposes by the investors who purchased the shares. A future income tax liability arises from the renunciation of mineral exploration costs to investors of flow-through shares.

(m) Joint interest operations

The Company's oil and natural gas exploration and production activities are conducted jointly with others and, accordingly, the financial statements reflect only the Company's proportionate interest in such activities.

(n) Revenue recognition

Revenue from the sale of oil and natural gas is recorded when the oil or natural gas is delivered and collectability is reasonably assured. The costs associated with the delivery including operating and production based royalties are recognized in the same period in which related revenues are earned.

(o) Adoption of new accounting standards

Effective February 1, 2008, the Company adopted the following standards of the Canadian Institute of Chartered Accountants' ("CICA") Handbook:

(i) Capital Disclosures

Section 1535 specifies the disclosure of: (i) an entity's objectives, policies and procedures for managing capital; (ii) quantitative data about what the entity regards as capital; (iii) whether the entity has complied with any capital requirements; and (iv) if it has not complied, the consequences of such non-compliance. Other than the additional disclosure in note 13, the adoption of this section has had no impact on the Company's consolidated financial statements.

CANADA GAS CORP.
(Formerly Wyn Developments Inc.)
Notes to Financial Statements
For the Nine Month Period Ended October 31, 2009 and 2008

3. SIGNIFICANT ACCOUNTING POLICIES (Continued)

(o) Adoption of new accounting standards (Continued)

(ii) Financial Instruments – Disclosures and Financial Instruments – Presentation

Sections 3862 and 3863 replace Section 3861, "Financial Instruments – Disclosures and Presentation", revising its disclosure requirements and carrying forward its presentation requirements. These new sections place increased emphasis on disclosures about the nature and extent of risks arising from financial instruments and how the entity manages those risks.

Section 3862 specifies disclosures that enable users to evaluate: (i) the significance of financial instruments for the entity's financial position and performance; and (ii) the nature and extent of risks arising from financial instruments to which the entity is exposed and how the entity manages those risks.

As a result of the adoption of these standards, additional disclosures on the risks of certain financial instruments have been included in note 4.

(p) Future accounting changes

(i) Goodwill and Intangible Assets

In February 2008, the CICA issued Handbook Section 3064, "Goodwill and Intangible Assets", replacing Section 3062, "Goodwill and Other Intangible Assets", and Section 3450, "Research and Development Costs". This section establishes standards for the recognition, measurement, presentation, and disclosure of goodwill subsequent to its initial recognition and of intangible assets by profit-oriented enterprises. Standards concerning goodwill are unchanged from the standards included in the previous Section 3062. The new section is effective for the Company for the year beginning February 1, 2009. The Company is in the process of assessing the impact of this new section on its financial statements.

(ii) International Financial Reporting Standards ("IFRS")

In 2006, the Canadian Accounting Standards Board ("AcSB") published a new strategic plan that will significantly affect financial reporting requirements for Canadian companies. The AcSB strategic plan outlines the convergence of Canadian generally accepted accounting principles with IFRS over an expected five year transitional period. In February 2008, the AcSB announced that January 1, 2011 is the changeover date for publicly-listed companies to use IFRS, replacing Canada's own generally accepted accounting principles. The IFRS standards will be effective for interim and annual financial statements commencing January 1, 2011. The effective date will require the restatement for comparative purposes of amounts reported by the Company for the year ended January 31, 2011. While the Company has begun assessing the adoption of IFRS for 2011, the financial reporting impact of the transition to IFRS cannot be reasonably estimated at this time.

CANADA GAS CORP.
(Formerly Wyn Developments Inc.)
Notes to Financial Statements
For the Nine Month Period Ended October 31, 2009 and 2008

3. SIGNIFICANT ACCOUNTING POLICIES (Continued)

(p) Future accounting changes (Continued)

(iii) Business Combinations

In January 2009, the CICA issued Handbook Section 1582, "Business Combinations", Section 1601, "Consolidations", and Section 1602, "Non-Controlling Interests". These sections replace the former Section 1581, "Business Combinations", and Section 1600, "Consolidated Financial Statements", and establish a new section for accounting for a non-controlling interest in a subsidiary.

Sections 1582 and 1602 will require net assets, non-controlling interests and goodwill acquired in a business combination to be recorded at fair value and non-controlling interests will be reported as a component of equity. In addition, the definition of a business is expanded and is described as an integrated set of activities and assets that are capable of being managed to provide a return to investors or economic benefits to owners. Acquisition costs are not part of the consideration and are to be expensed when incurred. Section 1601 establishes standards for the preparation of consolidated financial statements.

These new sections apply to interim and annual consolidated financial statements relating to fiscal years beginning on or after February 1, 2011. Earlier adoption of these sections is permitted as of the beginning of a fiscal year. All three sections must be adopted concurrently. The Company is currently evaluating the impact of the adoption of these sections.

(iv) EIC-173, Credit Risk and the Fair Value of Financial Assets and Financial Liabilities

In January 2009, the Emerging Issues Committee ("EIC") of the CICA issued EIC-173, "Credit Risk and the Fair Value of Financial Assets and Financial Liabilities", which clarifies that an entity's own credit risk and the credit risk of the counterparty should be taken into account in determining the fair value of financial assets and liabilities, including derivative instruments. EIC-173 is to be applied retrospectively without restatement of prior periods in interim and annual financial statements for periods ending on or after the date of issuance of EIC-173. The Company will adopt this recommendation for its fiscal year ending January 31, 2010.

CANADA GAS CORP.
(Formerly Wyn Developments Inc.)
Notes to Financial Statements
For the Nine Month Period Ended October 31, 2009 and 2008

4. FINANCIAL INSTRUMENTS

The Company classifies its cash as held for trading; accounts receivable as loans and receivables; and accounts payable and accrued liabilities, short term loans, and amounts due to related parties as other financial liabilities.

(a) Fair value

The carrying values of cash, accounts receivable, short term loans, amounts due to related parties, and accounts payable and accrued liabilities approximate their fair values due to the short term to maturity of these financial instruments.

(b) Interest rate risk

The Company is not exposed to significant interest rate price risk due to the short term to maturity of its monetary assets and liabilities. Future cash flows from interest income on cash will be affected by interest rate fluctuations.

(c) Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations. The Company is exposed to credit risk with respect to its cash; however, the risk is minimized as cash is held at a major financial institution.

(d) Other price risk

Other price risk is the risk that the fair or future cash flows of a financial instrument will fluctuate because of changes in market prices, other than those arising from interest rate risk or currency risk. The Company is not exposed to significant other price risk on its financial instruments.

(e) Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company's approach to mitigating liquidity risk is to provide reasonable assurance that it will have sufficient funds to meet liabilities when due. The Company manages its liquidity risk by forecasting cash flows from operations and anticipated investing and financing activities. The Company normally maintains sufficient cash and cash equivalents to meet the Company's business requirements. At October 31, 2009, the Company had a cash balance of (\$1,033) (2008- \$38,818) and accounts payable and accrued liabilities, and amounts due to related parties of \$447,801 (2008 - \$473,261). The Company will be required to raise additional debt or equity to meet its obligations during the year.

For the Nine Month Period Ended October 31, 2009 and 2008

5. PROPERTY AND EQUIPMENT

October 31, 2009				
	Cost	Impairment	Accumulated Amortization and Depletion	Net
Oil and gas interests, and well equipment	\$ 10,650,604	\$ 9,607,818	\$ 684,199	\$ 358,587
Furniture and equipment	3,200	-	1,357	1,843
Leasehold improvements	14,967	-	6,346	8,621
Software license	10,930	-	3,005	7,925
	\$ 10,679,701	\$ 9,607,818	\$ 694,907	\$ 376,975

January 31, 2009				
	Cost	Impairment	Accumulated Amortization and Depletion	Net
Oil and gas interests, and well equipment	\$ 10,626,767	\$ 9,607,818	\$ 666,244	\$ 352,705
Furniture and equipment	3,200	-	1,357	1,843
Leasehold improvements	14,967	-	6,346	8,621
Software license	10,930	-	3,005	7,925
	\$ 10,655,864	\$ 9,607,818	\$ 676,952	\$ 371,094

At October 31, 2009, costs totalling \$23,836 (2008- \$nil) relating to unproven natural gas reserves, included in oil and natural gas interests, have been excluded from the depletion calculation. No overhead charges have been capitalized to oil and gas properties for the period ended October 31, 2009 and 2008.

During the year ended January 31, 2008, the Company had an assessment completed on its natural gas reserves by an independent engineering firm in order to determine the quantity of proven reserves before production began in February 2007. The assessment resulted in significant proven reserves on the Company's oil and gas interests. When production began, actual production levels declined significantly during the year and the Company had the same engineering firm complete additional testing. The additional testing revealed a significant decline in the proven reserves. Based on the new information, the Company completed an impairment test in order to assess the recoverable value of the oil and gas interests. As a result of the test, in the 2008 year end, the Company wrote-down the oil and gas interests by \$8,736,588, based on the percentage decrease in the reserves from the new engineering report dated January 31, 2008 and the original engineering report dated January 31, 2007.

6. MINERAL PROPERTY INTERESTS

Expenditures incurred on the Company's mineral properties are as follows:

	Blustry/ Rand Project	Hearne Channel	Thrust Project	Total
Balance, January 31, 2008	38,034	-	872,429	910,463
Other	-	-	41,414	41,414
Plan of Arrangement- Wyn Metals Inc.	(38,034)	-	(913,843)	(951,877)
	(38,034)	-	(872,429)	(910,463)
Balance, January 31, 2009	\$ -	\$ -	\$ -	\$ -

During the year ended January 31, 2008, the Company decided to transfer its mineral properties to Wyn Metals Inc. ("Wyn Metals") and to spin out Wyn Metals.

On June 10, 2008, the Company proceeded to close the Plan of Arrangement (the "Arrangement") with Wyn Metals whereby the Company's interest in Wyn Metals was distributed to the shareholders of the Company. The Company restructured its share structure of the Company creating an unlimited number of Class A and Class B shares. Each common share was exchanged for a Class A and Class B share. The Class B shares were exchanged to Wyn Metals for Wyn Metals common share on a 11:1 basis (9,149,146 Wyn Metal shares were issued). The Class B shares were redeemed by Wyn Metals, and the redemption value was satisfied in full by the transfer of the mineral properties. The above transactions were approved by the shareholders.

The Arrangement was amongst related parties not in the normal course of operations and has been measured in these financial statements at the carrying amount of the mineral properties, and related cost involved with the Arrangement, being transferred. The Company showed a reduction to the investment in Wyn Metals in the amount of \$986,062, including legal fees of \$34,185, with a corresponding increase in deficit for the year ended January 31, 2009.

For the Nine Month Period Ended October 31, 2009 and 2008

7. RELATED PARTY TRANSACTIONS

- (a) The Company incurred management fees of \$83,250 (2008 – \$86,250), entertainment, travel and promotion expenses of \$5,370 (2008 – \$2,562), paid to companies controlled by to directors/officers for management services. At October 31, 2009, the Company has an accounts payable balance of \$111,374 (2008 – \$nil) payable to these directors/officers;
- (b) The Company incurred \$31,762 (2008 – \$182,025) for rent and office expenses to a company controlled by a director/officer of the Company for use of shared office space. An accounts payable balance of \$94,498 (2008– \$162,735) was outstanding at October 31, 2009;
- (c) During the period, the Company incurred \$29,250 (2008 – \$29,250) for accounting fees payable to a company controlled by an officer of the Company. At October 31, 2009, the Company has an accounts payable balance of \$12,300 (2008- \$nil) payable to this officer; and
- (d) During the period ended, the Company entered into shares for debt agreements to settle \$140,500 of accounts payable due to related parties by issuing 2,810,000 common shares at a deemed value of \$0.05 per share. The transaction received regulatory approval on October 7, 2009. These common shares were issued and subject to a four month hold period.

All of the above transactions and balances are in the normal course of operations and are measured at the exchange amount, which is the amount of consideration established and agreed to by the related parties.

8. SHORT-TERM LOANS

- (a) On March 9, 2007 the Company entered into a short-term loan agreement with an arm's length third party (the "Lender") for a principal amount of \$340,000. A payment on principal of \$255,000 and interest of \$7,813 was repaid to the Lender on February 28, 2008, resulting in an outstanding principal balance of \$85,000 on October 31, 2009.

The terms of the loan are as follows:

- (i) Principal is payable within six months (the "maturity date"). The maturity date was revised to November 30, 2008;
- (ii) Pay interest at a rate of 5% per annum on the portion of the loan amount that remains outstanding after the original maturity date, such interest to be calculated from the original maturity date; and
- (iii) Pay administration fees of \$5,000 (paid) and issue 60,000 common shares at a fair value of \$0.25 per share (issued) upon execution of the loan agreement. The fair value was determined using the market value at the time of issuance.

8. SHORT-TERM LOANS (Continued)

- (b) On December 20, 2007, the Company entered into a short-term loan agreement with Score Resources Ltd. ("Score") for a principal amount of \$92,000. As at April 30, 2009 and 2008, the principal balance of \$92,000 was outstanding. The loan is unsecured and bears interest at 12% per annum. The terms of the loan agreement are as follows:
- (i) Principal and interest are due by the earlier of April 30, 2008 (the "maturity date"), event of default or completion of equity financing;
- (ii) The Company issued 18,400 common shares at a fair value of \$0.50 per share as a financing fee (reflected in interest expense).

During the period, the Company has entered into shares for debt agreement with Score to settle \$110,000 of the short-term loan including the principal amount of \$92,000 and \$18,000 of interest. The Company received regulatory approval on October 7, 2009 and issued 2,200,000 shares at a deemed value of \$0.05 per share. These common shares are subject to a four month hold period. The balance of this loan as at October 31, 2009 is \$Nil.

9. CAPITAL STOCK

- (a) Authorized
 Unlimited common shares without par value
- (b) Issued and outstanding

On June 10, 2008, the Company consolidated its capital stock, warrants and options on a 5:1 basis. All share, warrant, option and per unit data in these consolidation financial statements have been adjusted to retroactively reflect this consolidation.

9. CAPITAL STOCK (Continued)

- (b) Issued and outstanding (Continued)
- (i) On June 25, 2007, the Company closed a private placement, with two tranches, for gross proceeds of \$871,400 by issuing 140,000 units at \$1.25 per unit and 696,400 units at \$1.00 per unit. Each unit consists of one common share and one common share purchase warrant with an expiry date of two years from closing date with an exercise price of \$0.26 per share. The Company paid \$45,490 in finder's fees related to this private placement.
 - (ii) On February 20, 2007, the Company issued 18,462 common shares with an fair value of \$36,000 to Tenaka Drilling Consortium Inc. pursuant to the November 20, 2006 Trutch East Participation Agreement.
 - (iii) On April 26, 2007, the Company issued 24,000 common shares with an fair value of \$30,000 to a company controlled by a director/officer of the Company and an arms length third party pursuant to the March 9, 2007 loan agreements (note 7(f)).
 - (iv) On April 25, 2007, the Company issued 180,000 common shares with an fair value of \$351,000 pursuant to the April 25, 2005 Thrust Project option agreement.
 - (v) During the year ended January 31, 2008, the Company renounced \$700,650 (2007 - \$nil) of exploration expenditures under its flow-through share program.
 - (vi) During the year ended January 31, 2008, the Company received share subscriptions of \$237,500 related to a private placement which was subsequently issued.
 - (vii) On February 20, 2008 the Company completed tranche 1 of a non-brokered private placement by issuing 2,700,000 units at \$0.25 per unit for gross proceeds of \$675,000. Each unit consists of one common share and one common share purchase warrant. Each common share purchase warrant entitles the warrant holder to purchase an additional common share for two years at \$0.26 per share. The Company paid \$38,000 and issued 152,000 warrants, valued at \$12,388, with the same terms as finders' fees in connection with this private placement.
 - (viii) On March 17, 2008 the Company completed tranche 2 of a non-brokered private placement by issuing 1,520,000 units at \$0.25 per unit for gross proceeds of \$380,000. Each unit consists of one common share and one common share purchase warrant. Each common share purchase warrant entitles the warrant holder to purchase an additional common share for two years at \$0.26 per share. The Company paid \$27,525 and issued 95,500 warrants, valued at \$5,014, with the same terms as finders' fees in connection with this private placement.
 - (ix) On February 22, 2008, the Company issued 18,400 common shares pursuant to the obligation to issue shares (note 8(b)(ii)).
 - (x) On October 7, 2009, the Company received regulatory approval and closed shares for debt agreements by issuing 5,100,000 common shares at a deemed value of \$0.05 per share. The Company settled \$255,000 in short term loans and accounts payable. This included \$140,500 owed to related parties and \$114,500 owed to lenders on short term loans.

(c) Contributed surplus

	October 31, 2009	January 31, 2009
Contributed surplus, beginning of year	\$ 1,544,809	\$ 1,246,931
Finder's fees	-	17,402
Stock-based compensation for year	-	280,476
Contributed surplus, end of year	\$ 1,544,809	\$ 1,544,809

(d) Stock options

The Company has established a stock option plan whereby the board of directors may, from time to time, grant options to directors, officers, employees or consultants. Options granted must be exercised no later than five years from the date of grant or such lesser period as determined by the Company's board of directors. The exercise price of an option is not less than the closing price of the stock on the last trading day preceding the grant date. The maximum number of options to be granted under this plan is 4,046,304 options.

	October 31, 2009		January 31, 2009	
	Number of Options	Weighted Average Exercise Price	Number of Options	Weighted Average Exercise Price
Options outstanding and exercisable, beginning of year	2,300,000	\$ 0.26	300,000	\$ 1.95
Granted	-	\$ -	2,300,000	\$ 0.26

		4,467,500	6,973,100

10. CONTINGENCY

Commencing in March 2005, the Company received letters from the operators of the Bougie Trutch Oil and Gas property requesting additional funding in the amount of \$137,326 for payment of expenditures. In 2007, the Company requested an external audit of the Bougie Trutch Oil and Gas property from the operators. One week prior to the commencement of the audit, the operators requested payment of these expenditures. It is the Company's position that the operators' request is without merit. The Company believes it has not received sufficient documentation from the operators to justify payment of the expenditures. The Company believes the operators should not be incurring these expenditures on the premise that the well has been abandoned by the operators for a significant period of time. No amounts have been accrued as the company is negotiating with operators. As at October 31, 2009, no further requests for additional funding has been made by the operators.

11. ASSET RETIREMENT OBLIGATIONS

The Company's AROs result from net ownership interest in oil and gas interests including well sites, gathering systems and processing facilities. The Company's future cash flows have decreased which has resulted in a decrease in AROs. The Company estimates the total undiscounted amount of cash flows required to settle its AROs is approximately \$14,000 at January 31, 2009 (2008 - \$31,042). These costs will be incurred between 2016 and 2024. A credit-adjusted, risk-free rate of 10% was used to calculate the fair value of the AROs. The discounted amount of \$4,707 is included in the Company's oil and gas interests.

12. CAPITAL MANAGEMENT

The Company manages its capital structure, being its capital stock, and makes adjustments to it based on the funds available to the Company in order to support future business opportunities. The Board of Directors does not establish quantitative returns on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business.

The Company currently has limited revenues and is dependent upon external financings to fund activities. In order to carry future projects and pay for administrative costs, the Company will spend its existing working capital and raise additional funds as needed. Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable. There were no changes in the Company's approach to capital management during the year ended October 31, 2009. The Company is not subject to externally imposed capital requirements.

13. SUBSEQUENT EVENT

- (a) On December 17, 2009, the Company announced a financing of up to \$1 million through a non-brokered private placement financing, issuing up to 20,000,000 units. Each unit is priced at \$0.05 and will include one share and one share purchase warrant exercisable at \$0.10 for a period of two years, subject to acceleration if the common shares of the Company trade at greater than \$0.25 over a 30 day period. Proceeds will be used to settle debts, pursue Canadian oil focused opportunities, and for general working capital.
- (b) On November 23, 2009, the Company entered into a debt assignment agreement with a director/officer of the Company and a non related party to assign \$109,875 worth of debt the Company owed to these parties to Award Ventures Ltd. (formerly Wyn Metals Inc.). Per the June 10, 2008 Plan of Arrangement whereby the Company transferred its mineral properties to Wyn Metals Inc., and to spin out Wyn Metals Inc., the Company incurred professional and filing expenses of up to \$109,875 that were attributable to Wyn Metals Inc. This became a receivable that was eventually written off during the year ended January 31, 2009. The November 23, 2009 debt assignment agreement will allow the Company to eliminate \$109,875 of accounts payable and short term loans owed, including \$22,829 owed to a director/officer of the Company and \$87,046 owed to a non related party to settle the March 9, 2007 short term loan agreement. Award Ventures Ltd. acquires the obligation to settle the liabilities with these parties.
- (c) On November 17, 2009, the Company announced its December 30, 2009 Annual General Meeting of the Shareholders.
